

## Supplies:

1 Tub of Water

At least 4 Colors of Nail Polish

Nail Polish Remover

Cotton Balls

Toothpicks or a Straw

Used Phone Case

Optional: Mod Podge

1. In your tub of water, add at least 4 different color nail polishes by dripping each color one at a time. Only a few drops are necessary, make sure the drops are all somewhat near each other.
2. Take your toothpick or straw and swirl all the nail polishes together until you are okay with the pattern.
3. Dip your used phone case into the water, exactly where the nail polish is. Make sure to cover the phone completely with the nail polish.
4. Grab your cotton ball and nail polish remover and clean the edges of excess nail polish.
5. Let the nail polish dry on the case for 20-30 minutes.
6. Optional: Take the Mod Podge and place it on top of the nail polish case. This will keep the nail polish on the case permanently.

Pro Tip: You can change the color of the polish whenever you want if you do not add Mod Podge. Simply take nail polish remover, rub off the nail polish, and start again with a different color! You can have a new phone case every week.

7. Let Dry for an hour.
8. Done!
